

GOWTHAM SAI KADALI

Associate DevOps Engineer | Cloud Infrastructure & Automation

Hyderabad, India | +91-9966282514 | gowthamkadali2510@gmail.com | linkedin.com/in/gowthamsaikadali | github.com/gowthamsaikadali

PROFESSIONAL SUMMARY

DevOps and Cloud Engineer with hands-on experience designing and deploying production-style infrastructure on AWS and Microsoft Azure. Proven ability to build end-to-end DevSecOps pipelines using Terraform, Docker, Kubernetes (EKS/AKS), and GitHub Actions/Azure DevOps, integrating automated security gates (SonarQube, Trivy) and full observability stacks (Prometheus, Grafana, Loki). Track record of independently architecting, troubleshooting, and documenting multi-service cloud environments end to end. Seeking to bring strong Infrastructure-as-Code, automation, and DevSecOps skills to a Cloud/DevOps Engineering team from day one.

CORE SKILLS

CI/CD & Automation: Azure DevOps, GitHub Actions, Jenkins

Cloud Platforms: Amazon Web Services (AWS), Microsoft Azure

Infrastructure as Code: Terraform (modular design, remote state, state locking)

Containerization & Orchestration: Docker, Kubernetes (EKS, AKS), Helm

DevSecOps & Security: SonarQube, Trivy, AWS WAF, Secrets Manager, IAM/RBAC, NetworkPolicies

Monitoring & Observability: Prometheus, Grafana, Loki, Azure Monitor, Amazon CloudWatch

Platforms & Version Control: Linux, Windows Server, Git, GitHub

PROJECTS

Automobile Manufacturing Dashboard — End-to-End DevSecOps Platform on AWS EKS

Flask, MySQL (RDS), Terraform, Docker, Kubernetes (EKS), Helm, GitHub Actions, SonarQube, Trivy, Prometheus/Grafana/Loki

- Designed and provisioned a production-style AWS environment (VPC, EKS, RDS, ECR) using 6+ modular Terraform stacks with S3/DynamoDB remote state, migrating the application from manual EC2 deployment to containerized microservices on Kubernetes with Helm and ALB Ingress.
- Built a DevSecOps CI/CD pipeline in GitHub Actions with SonarQube static analysis and Trivy vulnerability scanning as blocking security gates, automating ECR image build/push and Helm-based deployment.
- Hardened the platform end-to-end with IAM least-privilege roles, AWS WAFv2 (SQLi/XSS protection), Kubernetes NetworkPolicies and RBAC, and credential security via AWS Secrets Manager.
- Implemented a full observability stack (Prometheus, Grafana, Loki) with custom dashboards and CloudWatch alarms, validating alerting through simulated pod and node failure scenarios.

DevSecOps CI/CD Pipeline on Azure

Azure DevOps, Docker, AKS, Terraform, SonarQube, Trivy

- Architected a complete DevSecOps CI/CD pipeline in Azure DevOps with a self-hosted agent for a Java-based application, integrating SonarQube and Trivy as automated security gates prior to deployment.
- Provisioned AKS and Azure Container Registry (ACR) via Terraform for version-controlled, repeatable infrastructure, with Prometheus and Grafana dashboards for real-time performance and cluster health monitoring.

EDUCATION

Bachelor of Technology (B.Tech), Electronics and Communication Engineering

Ramachandra College of Engineering, Eluru — Graduated 2025

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02) | Microsoft Certified: Azure Fundamentals (AZ-900) | Microsoft Certified: Azure Administrator Associate (AZ-104)

ADDITIONAL INFORMATION

Languages: English, Telugu, Hindi

Core Competencies: Problem Solving, Team Collaboration, Continuous Learning, Attention to Detail
